

Description of the studio

The objective of this assignment is a completion of an urban open space design project, from master plan to detail and construction drawings. The Studio work on the transformation of an urban open space to an upgraded, collective space (space vecu) for every day activities, based on the site characteristics and the creative intervention of the designer in a Socio-ecological and conceptual approach. Open spaces in the Greek cities, special needs and general Principles are the main design hypotheses from the urban space analysis to the spatial organization. Elements of spatial arrangement, are also urban furniture and equipment for open space facilities.
